

SUMMARY

I am a Computer Scientist with a knack for visually appealing graphics and coding. This makes me interested in frontend development, which is mainly what I focus on. However, I also have a command over backend development and other aspects of this field. I am a person who loves to adopt unorthodox approaches to complete my tasks. I want to excel at my programming and content creation passions while I navigate through life in such a manner that improves my life after death.

EDUCATION

COMSATS University Islamabad, Lahore Campus

Bachelor of Science in Computer Science
